

About us

Metasan began operations in 2018 with the aim of supporting the supply of chemical raw materials for coatings, composites, resins, paints, and related industries. Backed by a team of experts, modern management, and core values—specialized consulting, fast supply, end-to-end support, guaranteed product authenticity, and fair pricing—Metasan has taken major steps to help its customers grow and progress. Today, customers source their required raw materials from Metasan across more than 20 product categories.

We are with you on the path of production

Metasan is committed to meeting the needs of manufacturing companies for high-quality materials. Backed by the expertise of its specialists and modern production equipment, Metasan manufactures a wide range of products in polyurethane, paints and resins, plastics, and phenolic materials.

Today, the company supplies an extensive portfolio for the refrigeration, construction, automotive, home-appliance, and casting industries. These production lines are engineered to deliver consistent quality and long-term product stability, helping customers meet and exceed leading industry standards.

Vision

The largest supplier of chemical raw materials in the Middle East

Mission Statement

Providing the needs of chemical raw materials for industries,
Taking into account Metasan's core values

Our Values

Reasonable Price

We strive to be able to offer our services at the best price by overseeing the supply chain and supporting the production process.

Guarantee of Authenticity

From the beginning of our activity, we have included in our strategy, the procurement of materials from original sources to make sure of the authenticity of the goods.

We adhere to our values...

360° Support

We have responded to customers comprehensively and as quickly as possible throughout all processes so that you be assured about the supply of materials

Fast Supply

By using advanced technologies and a specialized team, we are able to achieve unparalleled speed in the material procurement process.

Specialized Consultation

By utilizing specialized experts and specialized technical advice, we are able to introduce the best materials according to our customers' needs.

Plastic and Rubber

Compounds

PVC Compound
Polypropylene Compound
Polyethylene Compound
ABS Compound
Polycarbonate Compound
PC/ABS Compound
PP/GF Compound

Masterbatches

Color Masterbatch
Black Masterbatch
White Masterbatch
Diffuser Masterbatch

Recycle

Polypropylene Recycle
Polycarbonate Recycle
Polyethylene Recycle
ABS Recycle

Additives

Powdered Polyethylene Wax
Polyethylene Wax Emulsion
Thermoplastic Elastomer (TPE)
